

Dear MoveApps user,

We have some announcements that might be of your interest:

Pre-Conference Workshop at ICTC

We are excited to share that the registration is now open for our workshop "*User-friendly tools for conservation: Automated no-code analyses of animal tracking data using Movebank and MoveApps*" at the [International Conservation Technology Conference \(ICTC\)](#). Find the workshop description and the registration link [here](#).

If you are attending the conference and want to meet, do not hesitate to get in touch.

Contract Opportunity

Collaborators of ours from the [Yukon2Yellowstone project](#) are looking for someone for a contract job to implementing established survival analysis methods in R and packaging them as MoveApps Apps. Application **deadline January 21, 2026!** See all [details here](#).

Help us improve Movebank

During 2026, we will undertake a major renewal of the Movebank system to build scalability and sustainability. These upgrades aim to meet future needs for growing data volumes and transfer speed, software integration, and collaborative initiatives. What does Movebank mean for you? How could it better support your work? [Please tell us by taking our user survey](#). We are accepting responses until February 1st. A big thank you to all that already have participated.

With kind regards,

Anne Scharf

MoveApps Project Leader
